Air Cooling Series Autoclave

Autoclave Class B

Air Cooling Series
Autoclave Class B

Air cooling series, Best Value choice

Q50B/Q70B/Q51B/Q71B

Equipped with German vacuum pump, which can achieve vacuum level as low as -0.92bar, HäTmed air cooling autoclaves feature thorough sterilization and can pass challenging Helix Test. Precise temperature and pressure control all over the chamber protects delicate instruments; High standard manufacturing process, robust and durable; Optimal feature sets meet various sterilization need and offer best value choice to dental clinics.

Features & Advantages

Imported parts and powerful performance

Air cooling series autoclaves are equipped with chosen parts from all over the world, vacuum pump and temperature Sensor from German, solenoid valve from Italia and more. These parts ensure the best performance and fast turnover of instruments, meeting the need of a busy clinic.

Extreme Dryness

Air cooling series autoclaves generate saturated steam which ensures maximum steam penetration throughout the entire load and achieve optimal drying result even for cotton textile load.

Thermal Ultrasonic Baths

Digital Ultrasonic Cleaner 3L (White)

Includes:
- Basket
- Hose
- Power Cord

The new generation Digital Ultrasonic Cleaners use the process of ‘cavitation’ in cleaning items which is more efficient and is done on a much shorter cleaning time. The process of Ultrasonic Cleaning starts by millions of tiny bubbles that are generated inside the liquid by high frequency vibrations. Then the air bubbles burst inside the liquid and shake off the debris to achieve the cleaning effect.

Jinme J5 & J6 Handpieces

JINME DENTAL HANDPIECE CO.LTD.

jinme

Jinme J5 Handpiece

Its called a zero retraction system (Patent) which means your Future Jinme handpiece will be able to avoid impurities, viruses and bacteria being sucked into the cartridge when the handpiece has stopped. This will increase the service life of your bearings and increases your infection control for you and your patients well being.
Another top point is that the water and air is sprayed separately to give you better control for vision and heat.

Jinme J6 Handpiece

German bearings
- low noise, limited vibration, strong cutting power and long durability

NSK or Kavo Quick coupling connection
- system are availabe for choice

Consistent electric supply
- Bright up LED to maximum illumination only at 1V

Never ever damaged LED
- LED still perform well after 1,000 times sterilized in our laboratory

Light weight
- Ease ache of dentist's hand after long time operation every day

Quattro spray
Excellent cooling effect

Imported fiber optic rod
High illumination

Titanium coating
Luxury appearance and nonslip for grip

Polarity Free
No concern on polarity position in dental unit
