VITIQUE

VENEER CEMENTATION WITH ADDED VALUE 

Does your practice offer veneers?

Then the new Vitique Cementation System will surely be of interest to you. Ultimately, with Vitique and its services there are few reasons not to exhaust the potential of modern veneers.

Veneers: Knowing what to use and how.

High-quality veneers are constantly on the rise. It's a demanding market. With know-how and the right materials, dentists can gain a firm foothold in an exciting market.

In terms of cementation, the new Vitique Veneer-System is the ideal solution.

Vitique provides you with more comprehensive and practical support than ever: ProductSystem, EducationalSupport and AdditionalService.

The new Vitique: Veneer cementation with added value.

The new Vitique is a premium, resin-based luting material, developed especially for exacting veneering work.

It is an exceptional material for placement of thin-layered, silica-based ceramic and composite restorations.

That's not all Vitique has to offer.

Support for the dentist.

Beyond the material itself, Vitique and DMG offer you an all-round service package.

The Vitique concept has three pillars of support on which you can depend:

ProductSystem. EducationalSupport. AdditionalService.

Two kits, one system.

The Vitique product system contains two kits in one case: The Cementation Kit comprises cements and try-in pastes. Plus the complementary Vitique Accessory Kit containing etching gel, silane and bond. All of premium quality and carefully coordinated.

THE VITIQUE CEMENTATION KIT

The Vitique Cementation Kit contains luting composites, matching Try-In pastes and accessories.

THE VITIQUE ACCESSORY KIT

The complementary Vitique Accessory Kit contains everything you need for perfect veneer cementation: etching gel, silane and bonding system.

Plus Points for your Veneer Work

The high-quality materials in the Vitique product system offer you numerous practical benefits. Superior color stability, for example, ensures esthetic restorations that also last long-term. Further critical plus points:

Flexible shade selection.

Vitique delivers the full range of shades, enabling you to offer each of your patients the ideal esthetic solution.

The Veneer Cementation Kit comprises a standard range of three shades: B1, A2.5 and Transparent

Refills enable the range to be expanded by up to five additional shades: A1, A4, Bleach Light, Pink and White.

Precise Preview.

Know the results in advance:

The Vitique Cementation Kit contains try-in pastes to match each individual shade.

DMG has dedicated a lot of time and effort into coordinating the shades of these pastes.

The result: precise coordination of the colors in the Vitique try-in and cement range permits a reliable preview of the final result.

PERFECT COLOR COORDINATION.

The center of each color circle has been filled with Vitique Try-In paste.

PRACTICAL VENEER-TIP.

To facilitate the cementation of veneers, a special Veneer-Tip has been developed.

It can be used to evenly apply a flat strip of material, both conveniently and quickly.

REMOVE EXCESS MATERIAL WITH EASE.

The monomer formula patented by DMG provides ideal flow and residue free ceramic restorations. Owing to a perfectly adjusted gel phase, excess material is easy to remove – simply, cleanly and quickly.

PERFECT BONDING.

The TECO total etch bonding system

The bonding system contained in the Accessory Kit is DMG's brand name product TECO.

The single-bottle system convinces with excellent bond strength.

The proven enamel etch technique ensures reliable veneer cementation.

How to achieve perfection.

Vitique is not the only subject covered by the practical video tutorials offered by DMG. Aside from addressing product application, scientific background information and its relevance in practice is discussed. Comprehensively illustrated user reports add to the practical support on offer.

Take a look at the impressive results than can be achieved with Vitique in practice.

Case study 1: Initial situation (Fig. 1), simple removal of excess Vitique (Fig. 2), final result with ceramic veneers (Fig.3) [© Dr. Paolantoni, Italy]

Case study 2: Initial situation with simulated final result (Fig. 3), determination of preparation depth with a depth marker (Fig. 4), mock-up with Luxatemp Star (Luxatemp Ultra in U.S.)(Fig. 5) [© Dr. Etienne, France] **Case study 3:** Initial situation (Fig. 6), removed mock-up from Luxatemp Star (Fig. 7), mock-up with Luxatemp Star (Fig.8) [© Prof. Dr. Wahlmann, Germany]

The Vitique user guide: step-by-step veneer application

A comprehensively illustrated user guide is enclosed with each Vitique kit.

The 5 cards, developed together with dentists, experienced in working with veneers, clearly depict the entire treatment process. In words and pictures. Step-by-step.

From producing the wax-up through trial veneer to polishing.

Initial situation (Fig. 1), preparation of the veneer for bonding (Fig. 2), application of TECO bonding agent (Fig.3), polymerization of bonding agent (Fig. 4), layering of the veneer with an even layer of cement (Fig. 5), positioning of the Vitique-loaded veneer (Fig. 6), rough removal of excess cement using a brush (Fig. 7), polymerization of the Vitique cement (Fig. 8), the final result (Fig. 9)

ADDITIONAL SERVICE

The Vitique Expert Hotline.

As a Vitique customer, you not only have a dedicated DMG representative, but also benefit from a very unique service.

We have established a special hotline for dealing with your questions about veneers. Renowned veneer experts with extensive experience are on hand to answer your queries:

Prof. Dr. Wahlmann, Prof. Dr. Wainwright and others in the future, depending on demand.

The Vitique Expert Hotline can be reached at
+49 (0)40 - 84006 655

For more details on how our veneer experts can be of assistance, go to

www.dmg-dental.com/vitique

Prof. Dr.
Wahlmann

Prof. Dr.
Wainwright

*Please note that our experts cannot provide diagnostic and therapeutic advice, but are only available for advising on the optimal esthetic use of veneers.

Practicality – not just a promise

Who can make a better judgment about practical matters than a practicing dentist?

At DMG, dentists are therefore consulted personally at virtually every stage of our work, whether product tests, assessments of product ideas, concepts, methods of application or even promotional media.

Your online feedback.

Esthetic dental medicine – in professional photographs

The correct photograph is a deciding factor for optimal cosmetic results, as well as being essential to communication with the lab and patient. We are glad to be able to offer you such a special service.

As a Vitique user, you are eligible for special rates on the photography course »Esthetic dentistry – photographed professionally«.

The aim of the course is to enable the straightforward incorporation of professional, esthetic photography into your everyday work.

The course includes:

1. The views to be photographed with the corresponding settings
2. The right equipment: recommendations
3. Typical mistakes, and how they can be avoided

Along with the course, you will also receive a complimentary copy of the book »Cosmetic Dentistry & Photography«, containing a wealth of case studies and practical tips on how to take the perfect photograph.

The latest course dates are listed at www.dmg-dental.com/education.
